Transplantation Odyssey: Honoring History, Inspiring the Future

Recording of Main Auditorium
Sessions from **October 3-5, 2025**

Rubenstein Auditorium – Smilow Center
for Translational Medicine
at Penn Medicine

Philadelphia, PA ♦ United States

Overview

The Annual Symposium presented by the International Transplant Nurses Society features world-class speakers providing cutting-edge research and clinical information in transplant nursing. Attendees will have the opportunity to continue their professional education in a highly respected, stimulating environment, while earning continuing education credits and CEPTCs. ITNS' Annual Symposium is the ideal context to engage in innovative sessions, address evolving issues, and connect with an international organization of nurses devoted to the advancement of transplant nursing excellence.

This course is planned and organized by the International Transplant Nurses Society (ITNS).

Course Objectives

At the conclusion of this course, learners should be able to:

1. Identify the key disciplines involved in transplant care for patients and explain how each discipline contributes to the optimal outcome for the patient.
2. Explore emerging strategies and technologies that multi-disciplinary teams can adopt to enhance personalized approaches and improve patient outcomes.
3. Evaluate best practices for multi-disciplinary collaboration to enhance outcomes for long-term transplant recipient success.
4. List the challenges and opportunities encountered by transplant nurses in all phases of care and across a variety of healthcare systems.
5. Discuss emerging therapies to mitigate post-transplant complications.
6. Examine the technological advances that impact organ donation, improve organ utilization, and advance graft survival.
7. Identify the impact that emerging pharmacological treatments have on post-transplant care.
